

CoreStack FinOps

Whether you run AWS, GCP, Microsoft Azure, Oracle Cloud Infrastructure, or a combination of platforms, every organization needs a FinOps solution to help track and optimize their cloud spend. CoreStack FinOps is a NextGen Cloud Governance solution designed to help you develop a culture of financial accountability and realize the benefits of the cloud faster. With CoreStack FinOps, enterprises can manage costs proactively, ensuring they get maximum value from their cloud investments.

Key FinOps Capabilities

CoreStack FinOps provides a powerful set of capabilities that enable you to improve forecasting, prevent budget overruns, and make more data-driven business decisions.

Real-time cost visibility

Get granular visibility and insights into resource utilization and costs across multi-cloud via a unified dashboard.

Cost anomaly detection

Get detailed insights on cloud cost anomalies using Natural Language Processing (NLP) technology.

AI-powered forecasting

Enable highly accurate forecasting by leveraging AI capabilities that focus on understanding your current spend and capturing insights that predict how it may change.

Guardrails and auto-remediation

Set guardrails to spot drifts in cloud spending in real-time and trigger notifications or even auto-remediation, preventing cost overruns without human intervention.

Monitor cloud systems against custom guardrails, allowing you to spot drift in cloud spending in real-time and prevent cost overruns

Detect cost anomalies and optimize cloud consumption

Leverage AI to forecast cloud spending more accurately

Get holistic visibility and insights into multi-cloud spending with a unified dashboard

Access granular reporting and tools that foster a culture of financial accountability

Same-day resource discovery

Automatically discover new services the day they are deployed so the system can immediately begin tracking those resources.

Rate-based optimization

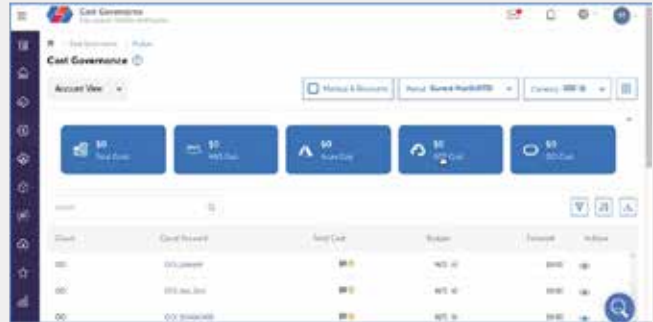

Review Reserved Instance (RI) utilization and adjust your usage accordingly, ensuring you have the optimal mix of RI and on-demand resources.

Flexible cost reporting and analytics

Get flexible reporting options to meet the varied needs of decision-makers – from holistic monthly multi-cloud reports to granular, action-oriented daily reports.

Usage-based optimization

Optimize your cloud usage through right-sizing, matching resources to workloads, identifying and remediating idle and orphaned cloud resources, and customizing configurations.

FinOps maturity assessment

Assess your cloud infrastructure and get detailed recommendations for optimization and cost avoidance.

Next Steps

Whatever your level of cloud maturity, FinOps is table stakes. With CoreStack, you get NextGen FinOps capabilities that go to work for you immediately. To get started or to learn more, visit www.corestack.io or contact us at sales@corestack.io.
